Introduction

Saskatchewan Education conducts an annual survey of graduates of post-secondary programs offered through the Saskatchewan Institute of Applied Science and Technology (SIAST). This Graduate Follow-Up Survey collects data and opinions on a variety of questions related to the graduates' employment status, occupation, employment search, relationship of training to occupation and general evaluation of the training received. The Employment Statistics Report describes responses to some of these questions, concentrating on employment status. Results are organized by individual training program and grouped by program type (Business, Health, Service, Industrial, Technology).

The Employment Statistics Report provides information on training programs which is not readily available elsewhere. It is used by students and counsellors in selecting programs of study. Those planning future training or studying changes in labour market conditions also find the information useful.

The Graduate Follow-Up Survey has been conducted for several years and we are pleased to note that other provinces have produced surveys similar to ours in recent years. We hope to continue to share this valuable information.

The Employment Statistics Report presents selected results from the 1987 Graduate Follow-Up Survey. Employment related information is shown for each training program, as well as notes on each page, as further explanation of the employment situation and training program. This report does not, however, attempt to provide all information about each training program. For further information about these and other programs, please contact:

Saskatchewan Institute of Applied Science and Technology (SIAST)

Information about SIAST and other post-secondary education programs may be accessed through the Crossroads computerized career information system. Crossroads provides information about programs and the institutions which provide them, and how high school subjects and occupations are linked to these post-secondary programs. It is designed to help prospective students, counsellors, and instructors find specific information quickly and effectively. For further information contact:

Overview Of Results

This year's survey included 2,373 students who graduated from 100 programs in 1986-87. Completed questionnaires were returned by 63.1% or 1,498 graduates. If the 128 graduates who could not be located are removed from the population, the response rate is 66.7%.

Survey results are based on the 1,498 respondents who answered the questionnaire. The industrial programs group has the most number of programs (40) and respondents (461). The health group has the second largest number of respondents at 454, even though it comprises only 15 programs. Business, with 237 respondents, has 13 programs represented. The 184 respondents in the technology category come from 17 programs. Finally, service program respondents number 162, from 15 programs.

Table 1
Response Rate
(% of graduates)

Group	Graduates	Respondents	Rate
Business	392	237	60.5%
Health	709	454	64.0%
Service	261	162	62.1%
Industrial	738	461	62.5%
Technology	273	184	67.4%
Overall	2,373	1,498	63.1%

All respondents to the survey can be classified as employed, unemployed or not in the labour force. A total of 78.6% of all respondents were employed at the time of the survey. This figure includes graduates who were employed in any occupation on a full time, part time or self employed basis. It includes graduates in training related jobs as well as those in other occupations. Health programs had the best overall employment rate at 88.1% of respondents.

Table 2
Respondents Employed, Unemployed, Not In The Labour Force
(% of respondents)

Group	Employed	Unemployed	Not In the Labour Force
Business	78.5%	11.4%	10.1%
Health	88.1%	9.5%	2.4%
Service	71.5%	10.5%	17.9%
Industrial	69.8%	24.5%	5.6%
Technology	83.2%	10.9%	6.0%
Overall	78.6%	14.7%	6.7%

(Note: Employed plus Unemployed equals the Labour Force.)

Unemployed respondents are those not working at the time of the survey but looking for employment. At the time of the survey 14.7% of all respondents were unemployed. Unemployment ranged from 9.5% for those who graduated from health programs to 24.5% for those who had completed industrial programs. It should be noted that respondents looking for work in fields such as construction may be unemployed at this time of year because of seasonal lay-offs.

Respondents were given several choices to explain why they were having difficulty finding a job. The largest proportion, 34.4% said that no jobs were available, while 26.7% said they did not have enough experience. Seasonal employment opportunities was cited by 17.4% of respondents who were looking for work. While 10.8% indicated no jobs were available in a desired location, and 10.3% indicated various other reasons, only half of one percent of those unemployed said their training was inadequate.

Table 3
Unemployed
If not employed, and looking for work, why can you not find a job? (% who answered)

Reasons	
No jobs available	34.4%
Not enough experience	26.7%
Seasonal employment opportunities	17.4%
No jobs in desired location	10.8%
Training inadequate	0.5%
Other	10.3%

If respondents were unemployed, they were asked how long they had been looking for work. The average length of time was 4 months. Even though unemployed at the time of the survey, 81.5% of unemployed respondents had worked in some occupation at some time since graduating from the program (55% of these had worked in a training related job).

Those respondents who were not employed and also not looking for work are classified as "not in the labour force". Overall, 6.7% of respondents were out of the labour force (neither employed nor unemployed). Respondents who completed service programs showed 17.9% not in the labour force, while only 2.4% of health program respondents were not participating in the labour force.

Of reasons given why respondents were not looking for work, 73.7% said they had returned to school. Next, 13.7% indicated family responsibilities was their reason for not being in the labour force. No respondents said they were discouraged with looking for work.

Table 4
Not In The Labour Force
If not employed, and not looking for work, why?
(% who answered)

Reasons	
Returned to school	73.7%
Family responsibilities	13.7%
Health/disability	1.1%
Discouraged with looking	0.0%
Other	11.6%

As noted earlier, 78.6% of respondents were employed. This represents employment in training related and non training related occupations. In total 66.6% of respondents had training related employment. Looking only at non training related occupations, 11.9% of respondents had jobs which did not use some or all of the skills or knowledge acquired in their training program.

Table 5
Training Related and Non Training Related Employed
(% of respondents)

Group	Training Related	Non Training Related	Employed (Total)
Business	65.4%	13.1%	78.5%
Health	83.5%	4.6%	88.1%
Service	56.8%	14.8%	71.6%
Industrial	52.9%	16.9%	69.8%
Technology	69.6%	13.6%	83.2%
Overall	66.6%	11.9%	78.6%

(Note: Training Related plus Non Training Related equals Total Employment — all are as a percent of total respondents).

Table 6
Training Related Employed
Full Time, Part Time, Self Employed
(% of respondents)

	Training Related Employment			
Group	Full Time	Part Time	Self Employed	Total
Business	57.0%	6.8%	1.7%	65.4%
Health	48.5%	34.8%	0.2%	83.5%
Service	41.4%	14.8%	0.6%	56.8%
Industrial	47.3%	2.8%	2.8%	52.9%
Technology	66.3%	2.2%	1.1%	69.6%
Overall	50.9%	14.4%	1.4%	66.6%

(Note: Full Time plus Part Time plus Self Employed equals Total Training Related Employment — all are as a percent of total respondents).

Training related employment was broken into three categories: full time, part time, and self employed. Overall, 50.9% of respondents had full time, training related employment. This compares with 14.4% of all respondents working part time, in training related employment. Of all respondents, 1.4% were self employed, in training related occupations.

Technology graduates showed 66.3% of all respondents employed in full time, training related occupations. In health programs, 34.8% were employed part time, in training related jobs. The highest rate of self employment, for those in training related jobs, was 2.8% of respondents from the industrial group.

For those employed in all occupations (training related plus non training related), 58.6% were full time, 18.2% part time, and 1.6% were self employed.

Table 7
Employed in All Occupations
Full Time, Part Time, Self Employed
(% of respondents)

	Employed			
Group	Full Time	Part Time	Self Employed	Total
Business	64.1%	11.8%	2.1%	78.5%
Health	50.4%	37.4%	0.2%	88.1%
Service	49.3%	21.6%	0.6%	71.6%
Industrial	61.0%	5.6%	3.0%	69.8%
Technology	73.9%	7.6%	1.6%	83.2%
Overall	58.6%	18.2%	1.6%	78.6%

Those who work part time were asked if they were looking for full time employment. Overall, 81.2% of part time workers were looking for full time employment. Of those employed part time in a training related occupation, 78.9% were looking for full time employment.

Table 8
Employed Part Time
If you work Part Time, are you looking for Full Time Employment? (% who answered)

Employed:	Yes	No
All occupations	81.2%	18.8%
Training related occupations	78.9%	21.1%

Respondents were asked to give their approximate gross salary on a monthly basis. The average full time salary for those employed in training related occupations was $1,484.33. Health graduate salaries averaged $1,805.28 for those who reported full time salary. Service salaries averaged $1,129.79 for full time gross monthly salary in a training related job.

Table 9
Average Gross Monthly Salary
For Respondents Employed in Full Time, Training Related Occupations

Group	All	Male	Female
Business	$1,435.67	$1,729.49	$1,305.49
Health	$1,805.28	$1,949.99	$1,793.73
Service	$1,129.79	$1,344.44	$1,091.16
Industrial	$1,232.30	$1,256.04	$ 896.36
Technology	$1,564.05	$1,619.19	$1,279.63
Overall	$1,484.33	$1,448.01	$1,518.60

Average salaries for males overall were slightly lower than for females, although in each program group category males' salaries were higher than females. This may be due to the fact that the second lowest salary category, industrial, has the highest representation of males (95.2%). Also the highest salary category, health, has the highest proportion of females (94.1%).

Table 10
All Respondents — Male/Female Distribution
(% of respondents)

Group	Male	Female
Business	32.2%	67.8%
Health	5.9%	94.1%
Service	19.9%	80.1%
Industrial	95.2%	4.8%
Technology	82.6%	17.4%
Overall	48.5%	51.5%

Overall, the male/female representation in the population of respondents was 48.5% male and 51.5% female. Industrial and technology groups were dominated by male respondents, while health and service groups had mostly female respondents.

Looking at only the population of male respondents, 73.2% were employed in some occupation. This compares to a 78.6% rate for the entire population of respondents (male and female). Considering only female respondents, 83.6% are employed in some occupation.

While the per cent of all respondents unemployed was 14.7%, 20.3% of male respondents were unemployed, and only 9.4% of female respondents said they were unemployed.

The employed plus the unemployed represent the labour force. The labour force as a per cent of the population gives the participation rate. The participation rate for males was 93.5% (73.2% + 20.3%) and for females 93.0% (83.6% + 9.4%). The overall participation rate for respondents was 93.3%.

Table 11
Male Respondents
(% of male respondents)

Group	Employed	Unemployed	Training Related Employed	All Occupations		
				FT	PT	Self
Business	73.7%	14.5%	56.6%	64.5%	3.9%	5.3%
Health	77.8%	14.8%	77.8%	59.3%	18.5%	0.0%
Service	53.1%	25.0%	40.6%	37.5%	12.5%	3.1%
Industrial	70.1%	24.7%	52.5%	61.6%	5.3%	3.2%
Technology	85.5%	10.5%	71.7%	76.3%	7.9%	1.3%
Overall	73.2%	20.3%	57.4%	63.9%	6.5%	2.9%

Table 12
Female Respondents
(% of female respondents)

Group	Employed	Unemployed	Training Related Employed	All Occupations FT	PT	Self
Business	80.6%	10.0%	69.4%	64.4%	15.6%	0.6%
Health	88.8%	9.1%	83.8%	49.9%	38.6%	0.2%
Service	76.7%	6.2%	61.2%	52.7%	24.0%	0.0%
Industrial	63.6%	22.7%	59.1%	50.0%	13.6%	0.0%
Technology	71.9%	12.5%	59.4%	62.5%	6.3%	3.1%
Overall	83.6%	9.4%	75.3%	53.9%	29.4%	0.4%

All respondents had 66.6% employed in training related occupations. For females, 75.3% of respondents were in training related employment. The male respondents showed 57.4% employed in training related jobs.

The full time employment rate for females was 53.9% (all occupations). Part time employment for females was 29.4%, and self employment only 0.4%. The male full time employment rate was 63.9%. Males working part time were 6.5% of all male respondents, and 2.9% of males were self employed.

Respondents were employed throughout Saskatchewan and in other locations. Of Saskatchewan cities, 26.6% of respondents worked in Saskatoon and 23.6% in Regina. Moose Jaw employed 5.5% and Prince Albert 1.7%. Swift Current was the employment location for 2.3% of respondents with jobs.

Business programs showed 45.2% of employed respondents in Regina, and 10.2% in Moose Jaw, with 15.6% in Saskatoon. Health followed a pattern similar to overall employment location in the province with 20.0% in Regina and 21.0% in Saskatoon. In service programs 55.2% were employed in Saskatoon and 11.2% in Regina. Industrial programs had 27.6% in Regina and 16.1% in Saskatoon. Technology had a more even split, with 32.0% in Regina and 30.7% in Saskatoon, and with 3.3% in Prince Albert.

Table 13
Employed Respondents
Saskatchewan Cities
(% of employed)

City	Total %	Business %	Health %	Service %	Industrial %	Technology %

All Employed	100.0	100.0	100.0	100.0	100.0	100.0

Saskatchewan accounted for 84.7% of employment locations of respondents while 15.3% were employed out-of-province. 94.0% of service employees were in Saskatchewan, 92.5% of business respondents and 91.0% of industrial respondents with employment were in Saskatchewan. In health, 26.0% of employed respondents were out-of-province and 17.0% of employed technology respondents worked outside Saskatchewan.

Alberta was the most popular out-of-province location for employed respondents, with 6.9% employed there. Second was British Columbia with 2.9% and Ontario with 2.0% of those employed. Alberta was the most common location out-of-province for business respondents (3.8%), health (11.3%), industrial (4.7%), and employed technology respondents (7.8%). For service programs, 2.6% were in Manitoba, of just 6.0% out-of-province in total.

Table 14
Employed Respondents Out-of-Province Locations (% of employed)

Location	Total %	Business %	Health %	Service %	Industrial %	Technology %
B. C.	2.9	2.2	6.0	—	0.9	2.0

Total Out-of-Prov.	15.3	7.5	26.0	6.0	9.0	17.0
All Saskatchewan Locations	84.7	92.5	74.0	94.0	91.0	83.0
All Employed	100.0	100.0	100.0	100.0	100.0	100.0

(Note: No respondents were employed in Quebec, New Brunswick, P.E.I. or Newfoundland.)

In job search activities, employed respondents could indicate a number of ways they obtained their employment. Of those employed at the time of the survey, 36.2% said they contacted the employer themselves (37.3% of those employed in training related occupations also indicated this reason). "Through a personal contact" was the second most frequent response. Obtaining employment through a Canada Employment Centre was mentioned by only 3.3% of employed respondents.

Table 15
How Respondents Obtained Employment
(% who answered)

Method Used	Respondents Employed	
	All Occupations	Training Related Occupations
Initiated Contact Myself	36.2%	37.3%
Through a Personal Contact	20.7%	18.8%
Responded to Advertisement	14.7%	14.9%
Assistance from Institute	12.3%	13.7%
Returned to Former Employer	7.5%	6.2%
Canada Employment Centre	3.3%	3.3%
Other	5.4%	5.8%
Total	100%	100.0%

(Note: Respondents could each choose more than one method. Percentages are based on all responses to the question.)

Respondents were asked if there were areas in which they could have used help in obtaining employment. Those who answered could choose more than one response. Of employed respondents, 37.2% indicated "employer contacts" would be helpful (35.7% of those employed in training related occupations said this). Responses to other choices were fairly evenly distributed. "Resume writing" was the least frequent response.

Table 16
Areas Where Respondents Could Have Used Help in Obtaining Employment
(% who answered)

Response	Respondents Employed	
	All Occupations	Training Related Occupations
Employer contacts	37.2%	35.7%
Job search techniques	19.8%	19.9%
Interview skills	18.1%	19.5%
Career counselling	15.5%	14.9%
Resume writing	9.4%	10.1%
Total	100.0%	100.0%

(Note: Respondents could each choose more than one response. Percentages are based on all responses to the question.)

Employed respondents were asked "could you have obtained your job if you had not taken this training program?" Of those in training related occupations, 85.6% said that they could not have obtained the job they had at the time of the survey if they had not taken their training program. Also, 75.1% of all employed respondents said they could not have obtained their job without the program.

Table 17
Could you have obtained your job if you had not taken this training program? (% who answered)

	Respondents Employed			
	All Occupations		Training Related Occupations	
Group	Yes	No	Yes	No
Business	31.5%	68.5%	21.9%	74.9%
Health	10.6%	89.4%	6.6%	93.4%
Service	33.6%	66.4%	18.8%	81.2%
Industrial	38.3%	61.7%	22.2%	77.8%
Technology	22.7%	77.3%	10.3%	89.7%
Overall	24.9%	75.1%	14.4%	85.6%

Of those employed in training related occupations, 36.7% indicated that before enrolling in the training program, they had had work experience which was related to the training program. For service program respondents, 45.5% had worked in an occupation related to service prior to enrolling in the training program. Only 23.8% of those in an occupation related to their technology program were employed in technology before taking their program.

Table 18
Employed Respondents Who Had Work Experience Related to Their Training — Prior to Enrolling in the Training Program (% who answered)

	Respondents Employed	
Group	All Occupations	Training Related Occupations
Business	28.3%	28.3%
Health	36.7%	37.7%
Service	42.7%	45.5%
Industrial	43.2%	44.3%
Technology	23.3%	23.8%
Overall	35.9%	36.7%

Respondents who were employed at the time of the survey, but were not employed in occupations related to their training were asked why they had a job not related to their training. Of those who answered, 35.7% said that training related jobs were not available. "Not enough experience" was cited by 21.4% and 10.7% could not find a job in their preferred location. Health and technology respondents were more likely to say that "training related jobs are not available".

Table 19
Reasons Why Employed Respondents Are Not in a Training Related Occupation (% of Respondents Employed in Non Training Related Occupations)

Reason	Total	Business	Health	Service	Industrial	Tech.
Training Related Jobs Not Available	35.7%	29.6%	60.0%	23.8%	29.3%	57.9%
Do Not Have Enough Experience	21.4%	29.6%	20.0%	23.8%	17.2%	21.1%
No Jobs In Preferred Location	10.7%	3.7%	13.3%	19.0%	10.3%	10.5%
Pursuing Different Career/Interests	7.1%	3.7%	0.0%	9.5%	8.6%	10.5%
Training Inadequate For Available Jobs	5.0%	11.1%	0.0%	4.8%	5.2%	0.0%
Jobs Are Seasonal	4.3%	0.0%	0.0%	9.5%	6.9%	0.0%
Other	15.7%	22.2%	6.7%	9.5%	22.4%	0.0%

All employed respondents were asked how well the training program prepared them for their job (whether training related or not). Of those who answered, 42.2% said the program prepared them "well" and 25.0% said "very well".

Table 20
How Well the Training Program Prepared Respondents for Their Job — Any Occupation (% of Employed)

Group	Very Well	Well	Adequately	Poorly
Business	26.0%	37.3%	27.7%	9.0%
Health	22.6%	48.8%	26.0%	2.6%
Service	35.2%	36.2%	24.8%	3.8%
Industrial	22.9%	40.5%	30.1%	6.9%
Technology	26.8%	38.0%	29.6%	5.6%
Overall	25.0%	42.2%	27.7%	5.1%

Those employed in training related occupations who indicated how well their training program prepared them for a training related job indicated "very well" in 27.2% of cases. The response "well" was chosen by 44.9%, and only 1.8% said "poorly". In service programs, 40.9% of those in training related employment said the program prepared them "very well".

Table 21
How Well the Training Program Prepared Respondents for Their Training Related Job (% of Training Related Employed)

Group	Very Well	Well	Adequately	Poorly
Business	29.4%	39.9%	26.8%	3.9%
Health	22.9%	49.6%	26.1%	0.1%
Service	40.9%	38.6%	19.3%	1.1%
Industrial	26.2%	44.5%	27.9%	1.3%
Technology	29.8%	41.9%	26.6%	1.6%
Overall	27.2%	44.9%	26.1%	1.8%

All respondents were asked to give an "overall quality" rating of the training program they completed. "Very Good" was the rating given by 47.0% of respondents, and 15.0% said "excellent". "Good" was indicated by 36.1%, with 1.9% saying "poor" and only 0.1% indicating "very poor".

Table 22
Rating of "Overall Quality" of Training Program All Respondents (%)

Group	Excellent	Very Good	Good	Poor	Very Poor
Business	9.0%	53.6%	35.6%	1.7%	0.0%
Health	12.0%	48.8%	37.6%	1.3%	0.2%
Service	21.6%	42.5%	35.3%	0.7%	0.0%
Industrial	20.1%	47.1%	30.0%	2.5%	0.2%
Technology	11.8%	37.1%	48.3%	2.8%	0.0%
Overall	15.0%	47.0%	36.1%	1.9%	0.1%

Program Statistics

Users' Guide

Employment statistics for each training program are reported on a single page. The following describes the type of information shown for each program:

Program Name — The name of the training program when respondents graduated (1986-87).

Institute Location — The SIAST location where the program was offered. Kelsey was formerly Kelsey Institute and the Saskatoon Region Community College and the Advanced Technology Training Centre. Wascana was formerly Wascana Institute and the Regina Plains Community College. Palliser was formerly the Saskatchewan Technical Institute (S.T.I.) and the Coteau Range Community College. Woodland was formerly the Northern Institute of Technology (N.I.T.) and the Prince Albert Region Community College and the Meadow Lake Vocational Training Centre. All programs reported here originated with former technical institutes (Kelsey, Wascana, S.T.I., N.I.T.).

Number of Graduates — Based on graduation lists, these represent 1986-87 graduates who were mailed survey questionnaires.

Number of Respondents — These are graduates who returned completed questionnaires. All survey results are based on this population.

Response Rate — The percentage of graduates who responded to the survey, or the respondents divided by the graduates.

Employment Profile — This section describes the employment status of respondents, at the time of the survey, which was approximately six months after graduation. Percentages are all a percent of respondents to the survey.

Training Related Employment — Respondents employed in an occupation related to their training (requires or uses skills and knowledge acquired in the program) are classified as being in training related employment. Respondents in **Full Time**, **Part Time**, and **Self Employed** in training related occupations are shown. Part time employment is fewer than 30 hours per week. **Total Training Related Employment** is the sum of all those in full time, part time, and self employed training related employment.

Non Training Related Employment — All employed respondents not in occupations related to their training are classified as non training related. These include those in full time, part time and self employed in non training related employment. Total training related employment plus non training related employment equals all employed respondents.

Unemployed — Respondents not employed, and looking for work, are classified as unemployed.

Not in the Labour Force — Respondents not employed, and not looking for work, are listed as "not in the labour force". The employed plus unemployed respondents are considered to be in the labour force.

All of the above percentages are a percent of all respondents to the survey.

"Unemployed respondents who had worked at some time since graduation (any occupation)" — These are respondents who were unemployed at the time of the survey, but who had worked in some occupation after they completed their training program.

"Respondents who said they could not have obtained their present job (any occupation) without completing the program" — These are employed respondents who indicated they could not have obtained the job they had at the time of the survey if they had not completed their training program.

Training Related Employment — This section refers only to respondents employed in training related occupations (full time, part time, and self employed). All percentages are a percent of those in training related employment.

Most Common Occupations — Occupations listed are training related occupations as stated by respondents and generally classified into categories established by the Canadian Classification and Dictionary of Occupations (C.C.D.O.).

Most Common Industries — Industries refer to the industry or sector of the employer as described by the respondent and using the Standard Industrial Classification (S.I.C.) for Saskatchewan.

Location of Employment — Location is based on the employer's address and classified using the Saskatchewan Hospital Services Plan (SHSP) coding system.

Average Full Time Monthly Salary — This is an average of the gross monthly salary as stated by respondents in full time, training related occupations.

Program Evaluation (Respondents' Overall Quality Rating) — All respondents were asked to rate the overall quality of their training program. Respondents chose one of: excellent, very good, good, poor, or very poor. Percentages are a percent of all respondents who answered this question.

Historical Information — This section shows results of previous year's Graduate Follow-Up Surveys, 1983 through 1986. 1987 results are from this year's survey. All percentages are a percent of all respondents. Percentages opposite "Training Related Occupation" are for respondents employed full time in occupations related to their training. Percentages opposite "Any Occupation" are for respondents employed full time in any occupation (this includes training related plus non training related, full time employment). The 1987 percentage for Training Related Occupation corresponds to the number in the Employment Profile section under Training Related Employment — Full Time. The 1987 percentage for Any Occupation combines the full time training related number above with those in full time, non training related employment. (Full time, non training related employment is not shown elsewhere).

Notes — This section provides further information about employment or the training program.

One or several of the following may be shown:

*** represents one respondent** — An occupation, industry, or location with an asterisk (*) represents only one survey respondent, in training related employment.

Small number of respondents—use caution with results — This note appears where less than ten respondents answered the survey questionnaire. Expressed as percentages, results from a few respondents may appear relatively high. In these cases it should be recognized how many respondents are represented, and caution used interpreting these results. A change in the status of one respondent could significantly vary the results in a very small class. However, the number of respondents in each category is accurate for those who responded to the survey.

Respondents were employed full time (part time, self employed), in training related occupations — This indicates the actual number of respondents (rather than percentage) employed in training related occupations, full time, part time or self employed.

Of those respondents employed part time, in training related occupations, (#/%) were looking for full time employment — This shows the actual number (or percent) of part time, training related employed who were looking for full time employment.

Respondents were employed in non training related employment — Shows the actual number employed in non training related occupations, rather than the percentage.

Respondents were unemployed — Shows actual number of unemployed respondents.

Respondents were not in the labour force — The actual number of respondents not in the labour force.

Respondents not in the labour force had returned to school — Shows the number (or percent) of respondents who were not in the labour force and indicated that they had returned to school. They may have returned to a similar or different program from the one completed.

Graduates may go on to second year of program — Indicates a one year program which produces graduates who may enter the labour force or who may return to take a second year of this program.

This program subject to seasonal employment demand — Some programs, especially industrial or construction programs, are subject to demand for graduates which is seasonal. The survey is conducted in the winter and some graduates may be on a lay-off at this time of year.

Salary often on a commission basis — Some occupations may pay graduates on a commission basis (e.g. hairstyling) and salary levels may vary from month to month.

New program — This is a program which has not previously produced graduates who were included in this survey.

Competency based education program — A program which allows students to progress at their own pace. Graduates may complete at various times of the year.

Cooperative education program — Periods of employment alternate with classroom studies. Programs indicated are those which were coop programs when these graduates completed (1986-87). Coop program employment may be optional or manditory.

Programs included in this report were offered during 1986-87. Some of these programs may have experienced changes or revisions for 1987-88 or 1988-89 academic years. Some programs may have changed location to another SIAST campus, or may no longer be offered by SIAST (these are indicated in the notes section).

Further and more detailed information on these programs, and other programs, should be obtained from specific calendars or by contacting SIAST (see Introduction).

Appendix A: Methodology

Methodology

Scope

Graduates included in the Survey include 1986-87 graduates from four SIAST campuses: Kelsey in Saskatoon, Wascana in Regina, Palliser in Moose Jaw, and Woodland in Prince Albert. Programs chosen are generally those 12 weeks or longer, granting a certificate or diploma upon completion. Where a program requires two years to complete, only second year completers are included as graduates, unless a certificate is granted to a graduate after the first year. Programs not included in this survey include Apprenticeship, Saskatchewan Skills Extension, Saskatchewan Skills Development, upgrading, employer-based or other special or limited programs. A new program which has not yet produced graduates or a program with very few graduates may not be included. One hundred SIAST programs were surveyed for 1986-87.

Procedures

SIAST campuses supplied graduate lists (names and addresses) to the department. These lists were checked against lists from the department's Student Information System (S.I.S.). Mailing labels were produced from the S.I.S. with some additional labels provided by the campuses. One questionnaire format was used for all programs and labels were attached to these questionnaires to identify each program and graduate. The questionnaires, with covering letter and postage paid envelope, were mailed to each graduate in mid-December, 1987.

Approximately one month later a second mailing was done to all graduates who had not yet returned a completed survey questionnaire. Survey returns were cut-off at the end of March, 1988.

Completed survey questionnaires were sorted, recorded, read, coded for occupation, industry and location, and data entered. A personal computer, data-base software program was used for data entry and analysis.

Analysis was done by individual training program, by program group or sector, and for all programs and graduates.The Employment Statistics Report presents selected critical analysis of the survey results. Other supplementary analysis of data gathered by the survey is done by request.

Response

A total of 2,373 graduates were mailed questionnaires. 1,498 returned completed questionnaires. The response rate is 63.1%. This compares favourably with other graduate surveys and is relatively high for a mail-out survey. 128 questionnaires were returned undelivered; the response rate was not adjusted for these.

This is not a random sample survey. A limited, specific population is surveyed on a 100% basis. Results describe an entire population of respondents rather than a selected sample and so statistical significance tests do not apply to this method. Tests by the department seem to indicate that it is neither more or less likely that an employed graduate will respond, compared with an unemployed graduate. Therefore, the employment status of the respondent population is assumed to be somewhat similar to that of the overall graduate population.

It should also be noted that results represent the employment situation of graduates at one point in time and at a certain period after graduation. The employment situation for graduates, of course, may change over time.

Survey Questionnaire

Saskatchewan Education

1987 Graduate Follow-up Survey

corrections to information on label:

Please complete questions which apply to you.

Results are treated as confidential. Your name will not be used.

Please check the appropriate box: ☛

1. Please choose only **One** of these to best describe your present situation. Are you:
   a. Employed, Full Time ❑ 1
   b. Employed, Part Time (less than 30 hrs. per week) ❑ 2
   c. Self-employed ❑ 3
   d. Not employed, looking for work (unemployed) ❑ 4
   e. Not employed, not looking for work ❑ 5

If You Answered: A. or B. or C....Please Continue With Question 2, below.

If You Answered: D....Please Go To Question 14, Page 3.

If You Answered: E....Please Go To Question 18, Page 3.

2. What is your job title?

   _____

3. Approximate gross monthly salary? $_____

4. What type of business/service is your employer in? (eg. hospital, accounting, garage, manufacturing)

   _____

5. Employer's Organization or Business Name:

   _____

   City/Province: _____

Please turn to page 2

6. How did you obtain your job? (check **Any** that apply)
   a. Assistance from Institute ❑ 1
   b. Canada Employment Centre ❑ 2
   c. Through a personal contact ❑ 3
   d. Responded to advertisement ❑ 4
   e. Initiated contact myself ❑ 5
   f. Returned to former employer ❑ 6
   g. Other: _____ ❑ 7

7. Could you have used help in the following: (check **Any** that apply)
   a. Employer contacts ❑ 1
   b. Resume writing ❑ 2
   c. Interview skills ❑ 3
   d. Job search techniques ❑ 4
   e. Career counselling ❑ 5

8. Could you have obtained your job if you had not taken this training program?
   Yes ❑ 1 No ❑ 2

9. Did you have work experience related to your training prior to enrolling?
   Yes ❑ 1 No ❑ 2

10. Did this training program prepare you for your job:
    Very well ❑ 1 Well ❑ 2 Adequately ❑ 3 Poorly ❑ 4

    If you work **Full Time** please go to question 12, below.

11. If you work Part Time, are you looking for Full Time employment?
    Yes ❑ 1 No ❑ 2

Please continue with question 12, below.

12. Is your employment **Directly Related** to the education/training you received from your institute program? (Does your job use some or all of the skills/knowledge acquired in your training program?)
    Yes ❑ 1 No ❑ 2

If Yes, please go to question 19, page 3
If No, please continue with question 13, below.

13. Why are you not in a job related to your training? (please check **One**)
    a. Training inadequate for available jobs ❑ 1
    b. Training related jobs not available ❑ 2
    c. Jobs are seasonal ❑ 3
    d. No jobs in preferred location ❑ 4
    e. Do not have enough experience ❑ 5
    f. Pursuing different career/interests ❑ 6
    g. Other: _____ ❑ 7

Please go to question 19, page 3.

Presently Looking For Work (Unemployed)

14. If looking for work (unemployed), why can you not find a job: (please check **One**)
    a. Training inadequate ❑ 1
    b. No jobs available ❑ 2
    c. Not enough experience ❑ 3
    d. Seasonal employment opportunities ❑ 4
    e. No jobs in desired location ❑ 5
    f. Other: _____ ❑ 6

15. How long have you been looking for a job? _____ months

16. Have you worked at all since completing your program?
    Yes ❑ 1 No ❑ 2

17. If Yes, was this work related to the training program you took?
    Yes ❑ 1 No ❑ 2

Please go to question 19, below

Not Looking For Work

18. If **Not** looking for work, why? (please check **One**)
    a Returned to school ❑ 1
    b. Discouraged with looking ❑ 2
    c. Family responsibilities ❑ 3
    d. Health/Disability ❑ 4
    e. Other: _____ ❑ 5

Please continue with question 19, below.

All Respondents:

Please answer the following about your training program:
(Make any additional comments on these or other questions at the end)

19. Should length of program be:
    Longer ❑ 1 Shorter ❑ 2 Same ❑ 3

20. Should program cover:
    More material ❑ 1 Less ❑ 2 Same ❑ 3

21. Should subjects/courses be:
    Same ❑ 1 Different ❑ 2

22. Should material be revised/updated:
    Yes ❑ 1 No ❑ 2

23. Instruction was:
    Good ❑ 1 Adequate ❑ 2 Inadequate ❑ 3

24. Equipment & Facilities were:
    Good ❑ 1 Adequate ❑ 2 Inadequate ❑ 3

Please turn to page 4

25. Please rate the Overall Quality of the training program:
Excellent ❑ 1 Very Good ❑ 2 Good ❑ 3 Poor ❑ 4 Very Poor ❑ 5

26. Did you move from another location to the city where the program was held?
Yes ❑ 1 No ❑ 2

27. When did you complete this training program?

Month |__|__| Year |__|__|

28. What is your present age? |__|__|

29. Sex: Male ❑ 1 Female ❑ 2

30. If you could change one thing about this training program, what would it be?

_____

_____

Comments:
If you have any additional comments about the training program or your experience in finding employment, please use this space:

Thank you for completing the questionnaire.
Please return as soon as possible in postage paid envelope.

Appendix C:
Covering Letter to Graduates

Saskatchewan

Saskatchewan
Education

2220 College Avenue
Regina, Canada
S4P 3V7

Dear Graduate:

The Department of Education is asking for your assistance in completing the enclosed questionnaire.

As we attempt to improve educational opportunities in Saskatchewan we require information and opinions on training and employent in the province. As a recent graduate you are in a unique position to provide this information. The survey responses are kept confidential and results are reported by program; no reference is made to individuals.

Please take a few minutes to complete the questions which apply to your situation on each of the four pages. Instructions in the questionnaire will guide you through the questions.

Then, please return the questionnaire as soon as possible in the postage-paid envelope enclosed. Your prompt response will save us contacting you further.

This information will be very valuable in planning future training programs and will be more accurate with a maximum number of responses.

Thank you for your co-operation.

Yours sincerely,

Donna Krawetz

Donna Krawetz, Director
Policy and Planning Branch
